

DATA SHEET

Managed services for casualty exposure management

TRANSFORMING CASUALTY RISK INSIGHT INTO ACTION — CLEANSED, ENRICHED, AND BACKED BY SPECIALISTS IN CASUALTY DATA AND INSIGHT

KEY FEATURES AND BENEFITS

- **End-to-end data handling:** From ingestion to delivery, including cleansing, standardization, name matching, and enrichment using Orbis IDs
- **Specialist team support:** A dedicated team that gets to know your portfolio, acting as an extension of your internal resources
- **Proven data quality uplift:** Customers experienced up to 25% improvement in data quality, allowing for more accurate risk assessment and reporting
- **Portfolio-level analytics:** Accumulation tracking, litigation monitoring, and deterministic scenario analysis available across casualty lines
- **Flexible delivery model:** Modular service options that scale with your needs, whether for a single portfolio or across an enterprise
- **Accelerated decision-making:** Free up internal teams to focus on underwriting, reserving, and strategic risk decisions

SOLVING THE CASUALTY DATA CHALLENGE TOGETHER

Casualty exposure management is complex, fragmented, and often under-resourced. Moody's managed service acts as an extension of your team, handling data cleansing, name matching, enrichment, and analytics so you can focus on decision-making rather than data wrangling. Whether you want deeper insights into your portfolios or managing accumulation hot spots, we deliver clarity, consistency, and confidence.

By working closely with your portfolio over time, our specialists can deliver measurable impact, with some customers seeing up to a 25% improvement in data quality; this promotes more accurate portfolio management and accumulation tracking.

WHAT WE DELIVER

A fully managed service for casualty exposure management, including:

- Cleansing and standardization of insured and policy data
- Name matching and enrichment leveraging Moody's Orbis database of more than 580 million companies
- Portfolio-level analytics and accumulation management
- Turnaround times to support pre-bind cedant analysis
- Analytics that include understanding both single company and entity accumulations
- Support for internal management reporting
- Support for Lloyd's Realistic Disaster Scenarios and regulatory reporting
- Analytics that cover both short-tail and long-tail casualty catastrophes

HOW IT WORKS

Upload your exposure data, and then we do the rest:

- Our team of specialists processes and enriches your data.
- We deliver our outputs in client-ready formats for internal use and external reporting.
- Our services are designed to support multiple portfolios and evolving risk scenarios.

WHY CUSTOMERS CHOOSE US

- **Expertise** — A dedicated team with deep casualty domain knowledge
- **Efficiency** — Faster turnaround and reduced internal burden
- **Insight** — Outputs that support underwriting, reserving, and risk decisions
- **Flexibility** — Modular service options tailored to your needs
